Professional Summary

AI Data Science engineering graduate with hands-on experience in developing machine learning and deep learning models through academic projects and internships. Proficient in Python, data analysis, and frameworks such as TensorFlow and PyTorch. Skilled at applying data-driven approaches to solve real-world problems and optimize performance. Demonstrated ability to work collaboratively in team environments and deliver impactful solutions. Seeking to contribute technical expertise and innovative thinking in a dynamic, growth-oriented organization.

Work Experience

Software Engineering Intern– Scalefull Technologies Pvt Ltd

Dec 2024 – Feb 2025

- Developed and implemented machine learning models on structured/unstructured data, achieving improved accuracy and efficiency.
- Preprocessed and analyzed large datasets using Python (Pandas, NumPy), enhancing data quality and model performance.
- Built and fine-tuned models using TensorFlow/PyTorch and Scikit-learn for tasks such as classification, regression, or NLP.

Tech Stack: Python, Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, Matplotlib, Seaborn, Jupyter Notebook, Git, GitHub

Projects

Cancer Prediction System using Logistic Regression

- Developed a machine learning model using Logistic Regression to predict the likelihood of cancer based on medical diagnostic data.
- Performed data preprocessing, including handling missing values, feature scaling, and exploratory data analysis to improve model performance.
- Trained and evaluated the model using metrics such as accuracy, precision, recall, and F1-score.
- Visualized data insights and model performance using Matplotlib and Seaborn.

PDF & General Q&A Chatbot with RAG

- Built chatbot supporting PDF uploads and voice input using OpenAI API
- Integrated ChromaDB for vector search and LangChain for orchestration

Intraday Trading Bot with ML Models

- Developed trading bot using ensemble models: XGBoost, SVR, Random Forest, ARIMA
- Achieved high accuracy through hyperparameter tuning and custom features

Technical Skills

AI & ML:	Regression, classification, clustering, model evaluation (accuracy, precision, recall, F1-score)
Libraries/Frameworks:	Scikit-learn, LangChain, Hugging Face Transformers, LlamaIndex
Programming:	Python (OOP, scripting, data structures, algorithms), JavaScript
Data Analysis:	Pandas, NumPy, data cleaning, preprocessing, visualization (Matplotlib, Seaborn)
Databases:	MySQL, MongoDB
Cloud & APIs:	Google Cloud Platform (GCP), REST APIs, API integration
Tools & Infrastructure:	Git, GitHub, Linux, VS Code, Jupyter Notebook, Google Colab
Soft Skills:	Problem-solving, teamwork, adaptability, eagerness to learn

Education

B.E. in Artificial Intelligence and Data Science - 7.86 CGPA

D.Y.Patil College Of Engineering, Akurdi | 2026

HSC - 82.5%

Sri Chaitanya Junior College, Pune | 2022

SSC - 80%

Oxford International School, Nanded (MH) | 2020

Certifications

- Hugging Face NLP Course
- Lang Chain for LLM Application Development
- Google Generative AI Learning Path
- Microsoft AI Skills Challenge
- Python for Data Science

Additional Information

Languages: Hindi, English, Marathi | **Interests:** Chess, Badminton, Music
